Dataprise Fully Managed: Cloud Edition
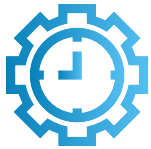

Dataprise's fully managed, fully secured complete cloud solution is your IT platform as a service. This all-in-one platform is designed to deliver everything a small to midsize business needs to stay productive, secure, and efficient.

We combine a Microsoft Cloud-powered IT environment with the productivity, data protection, and security tools required to keep your business operating at peak performance. We then wrap it in 24x7 real-time support from our IT pros who are focused on giving your end users a harmonious IT experience.

Your Modern Cloud Platform

We provide an expertly configured cloud-based IT infrastructure that harnesses the power of Microsoft 365 and Azure. This modern cloud approach eliminates the need for on-premises hardware, delivers flexibility, and makes it easy to support a hybrid workforce. Once in place, our team monitors, manages and optimizes the platform to keep your business running.

Real-Time User Support Delivered

Keep your employees productive, connected, and happy with real-time support when they need it and how they need it. Your team can reach our 135-person team by chat, email, phone or our myHelpDesk™ app and expect a rapid response. Our mission is to deliver simply the best end-user experience.
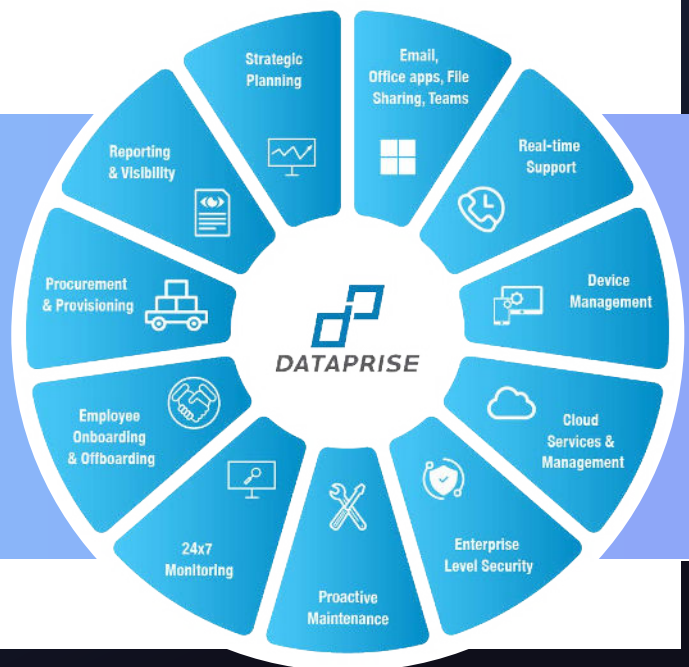

Next Level Security, Resiliency & Protection

A highly resilient infrastructure is table stakes for all businesses regardless of size. That's why Dataprise loaded this all-in-one platform with must-have data protection and cybersecurity capabilities including next-gen ant-virus, endpoint detection and response, multi-factor authentication (MFA), backup, disaster recovery and more.

With Dataprise's All-in-One IT Platform you have everything needed

Delivered at a fixed monthly cost – to run, grow, and drive your business forward.

Experience the difference of a harmonious IT platform flawlessly orchestrated for your business.
